Contents Volume 50

Contents

Editor's corner: Y2K behind us: smooth sailing and blue skies?
R.L. Glass 1

An encompassing life cycle centric survey of software inspection
O. Laitenberger and J.-M. DeBaud 5

Software management and cost estimating error
A.L. Lederer and J. Prasad 33

An analysis of factors affecting software reliability
X. Zhang and H. Pham 43

Module interconnection features in object-oriented development tools
S.E.R. de Carvalho and J.C.S. do Prado Leite 57

Reading between the lines: an examination of systems analysis and design texts
M.M. Misic and N.L. Russo 65

On the concept of coupling, its modeling and measurement
F. Xia 75

Specifying and verifying real-time systems with timing uncertainty
H.S. Bae, I.S. Chung and Y.R. Kwon 85

Guest Editor's Corner: The CMMI: it's formidable
D.J. Reifer 97

ElGamal-like digital signature and multisignature schemes using self-certified public keys
Y.-S. Chang, T.-C. Wu and S.-C. Huang 99

Robust transparent image watermarking system with spatial mechanisms
P.-L. Lin 107

Towards integration of use case modelling and usage-based testing
B. Regnell, P. Runeson and C. Wohlin 117

DHARMA: A tool for evaluating dynamic scheduling algorithms for real-time multiprocessor systems
G. Manimaran, A. Manikutty and C. Siva Ram Murthy 131

The effect of compression on performance in a demand paging operating system
A. Wynn and J. Wu 151

Editor's corner
The "maintenance-first" software era
R.L. Glass 171

Domain analysis for software reuse
A. Sutcliffe 175

A problem-oriented and rule-based component repository
H. Zhuge 201

An architecture for software that adapts to changes in requirements
Y.A. Eracar and M.M. Kokar 209

The impact of software architecture reuse on development processes and standards
F.A. Cioch, J.M. Brabbs and L. Sieh 221

State restoration in Ada 95: a portable approach to supporting software fault tolerance
P. Rogers and A.J. Wellings 237
